

Trinity High School

7574 Division St. | River Forest, IL

Cullen Construction Management served as Owners Representative for Trinity High School on a renovation and construction project which provided a new primary entrance for the students, administrative offices, an elevator for handicapped accessibility to all levels of the school, a 2,000 sf new interior connection link between the existing school and athletic facility, and a Student Center featuring an exterior courtyard gathering space and a green roof designed as an outdoor classroom.

The Renovation scope included two phases that occurred concurrently; a design to connect the campus in an accessible manner inspired by the campus history. As well as the addition of auditorium upgrades including new seating, finishes, air conditioning, ADA accessibility and upgrades to the existing classrooms, cafeteria, corridors, and bathrooms.
